FD5301

Product Description

Module FD5301 is designed to operate together with Fire Extinguishing Control Panel FS5200E. The device allows remote access on a part of the panel controlling components and indicators, related with the extinguishing process.

The remotely controlled panel basic functions are:
– Manual activation of Extinguishing;
– Selecting the Control Panel Modes of operation – Manual/Auto mode or only Manual mode;
– Disable Extinguishing;
– Hold Extinguishing.

The following indicators are duplex controlled:
– Fire Condition 2nd Stage;
– Disable Extinguishing;
– Gas Released;
– Manual Mode;
– Manual/Auto Mode.

Technical data

Indication: LED
