

IFS7002R - The IFS7002R repeater panel allow vital information from the IFS7000 system to be communicated through points around the building, remote from the fire alarm control panels. Distributed at strategic points in a facility - such as nurse stations, floor landings, control rooms - valuable time can be saved when identifying the location of a fire and/or evacuating the building.

Technical data:

Power supply from panel IFS7002:

- Voltage: $(23 \pm 7)V$
- Maximal current: 180 mA

External power supply (in accordance with EN54-4):

- Voltage: $(12 - 30)V$
- Maximal current: 300 mA

Interfaces for communication:

- with panels IFS7002: CAN 2.0B
- with PC: directly RS-232 or LAN through converter RS232 – LAN Ethernet

PC keyboard for setup and programming: Directly

Indication:

- Light: LEDs
- Text: LCD touch screen display, 320x240 points, light
- Sound: Built-in sounder
