Bidirectional Wireless keypad

Bidirectional wireless keypad powered by batteries (2 batteries AAA - Alkaline 1.5V). It can be fed with external power (4 - 18 Vdc). It is equipped with a LCD display 32 characters on two lines, and a programmable NFC / RFID tag reader, with which it is possible to arm / disarm and enable / disable programmed outputs. It is a full bidirectional keypad and allows the user to have a real feedback of the status of the system (not ready zones, troubles etc.). Dimensions: W 135, H 116, D 24 mm

Features:

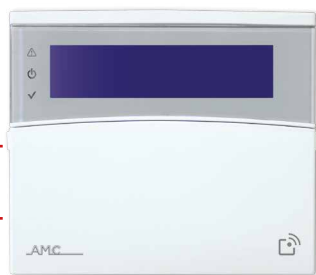

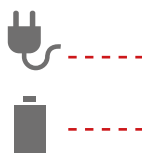

- Arm / disarm panel (in all configurations)
- Not ready zones alert
- Bypass zones
- Change / modify personal user code
- Allow technical access
- Log event reading
- Outputs triggering
- Tag readers management

Order Codes:

K-LCDW800: 868 MHz

K-LCDW900: 916 MHz
