1.1 Equipment identification (Manufacturer)

Additional information shall be included in the users' manual:

Classificazione del ricevitore Receiver classification, see clause 4.1.1;	Class III
Duty cycle del trasmettitore Transmitter duty cycle, see clause 8.10; or	50% (100%)
Uso del protocollo Listen Before Talk LBT if used, see clause 8.11.	No

Receiver category	Relevant receiver clauses	Risk assessment of receiver performance
I	8.1, 8.2 and 8.3	Highly reliable SRD communication media; e.g. serving human life inherent systems (may result in a physical risk to a person).
II	8.2 and 8.3	Medium reliable SRD communication media e.g. causing Inconvenience to persons, which cannot simply be overcome by other means.
III	8.3	Non-critical SRD communication media whose failure to operate correctly causes loss of function which can be overcome by parallel means.
If receiver category 1 or 2 is selected, this shall be stated in both the test report and in the user's manual for the equipment.

3. CONDITIONS DURING TESTING

3.1 Operating test modes and test conditions

Le condizioni operative adottate durante le varie prove sono elencate nella tabella che segue e contrassegnate da un identificatore (#..) a cui fa riferimento la voce "Condizione operativa dell'apparecchio in prova" delle schede tecniche relative ai risultati di prova (vedi Sezione 4).

In the following table there are the operating conditions adopted during tests identified by an indicator (#..) at which has been referred the item "Operating condition of the equipment under test" of all technical sheets of the tests (see Section 4)
