ABSOLUTA T-LINE Series Keypads

Features That Make a Difference:

- Large, clearly recognizable buttons and 2 x 16 LCD display

- Clean, low-profile white or black case blends into any décor

- Integrated wireless proximity reader works with a range of cards and tags

- 3 programmable I/O terminals to easily configure as needed

- Compatible with roller blind detectors to deliver an enhanced security solution

- 7 quick-view LED indicators clearly signal behavior (arm, A arm, B arm) and status (on, off, slow flash and fast flash)

- Adjustable blue back-light display to optimize legibility for installation environment

- Adjustable buzzer volume

- Two-part body with plug-in cover makes surface mounting a snap

- Integrated level on back mounting plate allows quick install

The Difference is Black & White with the ABSOLUTA T-LINE Keypads

Bentel Security's ABSOLUTA T-LINE keypads deliver a scalable, easy-to-use and easy-to-install security interface in sleek white or black casing, for ultimate design flexibility.

The ABSOLUTA T-LINE slim-profile keypads provide installers with easy programming and installation by offering a built-in leveling tool and two-part body with mounting bracket.

With a range of integrated features – such as a proximity reader and three I/O terminals – the wired ABSOLUTA T-LINE keypad can easily support future growth and scalability.

Have absolute confidence with the ABSOLUTA T-LINE Keypads from Bentel Security.

Highlights

Scalable Design: As your customers' needs grow over the years, so can their ABSOLUTA T-LINE keypad security system. The integrated proximity reader is compatible with MINIPROXI tags, PROXI-TAG and the PROXI-CARD. Even if your customer does not require this feature now, it can be easily configured to use in the future.

The **flexibility** offered by having three on-board programmable input/output terminals means that additional detectors and sensors can be quickly added without requiring wiring back to the control panel. These can be programmed to function as three input zones (input expander) or three outputs (output expander). For example, connect a nearby roller blind or additional motion detectors to augment the security solution.

The buzzer and blue backlight can be easily adjusted to address changing needs. If the room's existing lighting changes, the installer can quickly adjust the backlight on the LCD display to improve legibility.

Finally, every ABSOLUTA T-LINE keypad has been engineered to work with the new **BPI-2 communication protocol.**

Easy Installation: Installing the ABSOLUTA T-LINE Keypad is easy. The two-part body consists of a back surface-mounting plate and front cover. Installers can easily level the mounting plate with the **integrated 'bubble' level**, securely fasten the plate and connect the 4-wire terminal connection. The front cover is then snapped onto the mounting plate to complete the electronic connection.

Programming the keypad by following the provided installation instructions is clear and simple. Installers can **adjust brightness, contrast and buzzer volume** to meet customer's requirements and room configuration.

Ordering Information

ABSOLUTA T-Black .... Keypad with 2x16 LCD display. Black housing color.

ABSOLUTA T-White.... Keypad with 2x16 LCD display. White housing color.

Specification

Dimensions .... 135 mm x 114 mm x 28.5 mm (5.3" W x 4.5" H x 1.1" D)

Input voltage..12 VDC Nominal

Current draw .... 70 mA (standby) 200 mA (activated)

Operating environment .... 5 to 40 °C (41 to 104 °F)

Relative humidity .... 5 to 95%

Wiring...................................Standard four-wire connection

Compatibility

With ABSOLUTA and all KYO Series control panels
