

4 AO Module

Special technology makes sure the analog signal from the module is precise.

Features

- 4x analog outputs 0-10V / 1-10V
- Recommended cable lengths between the module and the controlled device:
 - Cat5 cable – max 35 meters
 - Cat6 cable – max 50 meters
- Maximum current on one output is 10mA
- Energy consumption 2W
- DIN rail, 2 modules. Width 36mm, height 59mm.
