

14 BLE Module

It features integration of encoder DC motors for precise angle control, ability to change speed of the blind movement and motor load protection.

Features

- 14 outputs for DC motors
- 14 encoder inputs compatible with encoder motors from Somfy and Orshade
- Output PWM frequency 20kHz
- Overvoltage protection 30V
- Idle current approximately 50mA
- Motor current 2A continuous (2.2A peak)
- Motor/module voltage 12-24V +/-10%
- Current limit adjustment between 0...2A
- Operating frequency 25kHz
- Operating temperature -20..+70 C
