

Dual technology curtain detector for outdoor use in shutters

- Dual technology curtain detector with F1 VESTA compatible wireless transceiver for outdoor use
- 12-meter range, 7.5 °
- 24 GHz microwave frequency, and working mode
- Relay output and tamper
- IP54
- Low consumption.

Reference / Model	VESTA-063 / 9456
Features	
Outdoor double technology miniaturized detector, specially indicated to be installed in shutters	
VESTA F1 compatible included wireless transceiver	
Thanks to its low consumption, it can be powered by the transmitter battery or a 3.6V lithium battery	
Creates a curtain barrier of approximately 7.5 ° and has an adjustable coverage of up to 12 meters	
In addition, the electronics are covered with resin capable of guaranteeing its correct operation in any climatic condition	
Specs	
Coverage: 12 meters, 7.5 °	
Microwave frequency: 24 GHz	
Sensitivity setting: 1 MW Trimmer / 1 IR Trimmer	
Working mode	
Alarm relay output	

Dual technology curtain detector for outdoor use in shutters

Reference / Model	VESTA-063 / 9456
Tamper	
Power supply: 3V ~ 10V DC	
Consumption: 8µA	
Protection degree IP54	
Dimensions: 37 (W) x 125 (H) x 40mm
